5a. Doc. Revision	Pre-Release 1			
6. Name of RID Team		SLS RID Review Team		
7. Problem				
<p>Paragraphs 2.2.2.1 System: Under subparagraph 2.2.2.1.14 thru 2.2.2.1.18, the SLS provides requirements for Data Health, Data Fusion, Constraint Management, and Data Distribution. By providing these requirements, the SLS is implying a software system architecture, while the SLS does <u>not</u> present a section defining the SLS SOFTWARE ARCHITECTURE REQUIREMENTS.</p>				
8. Recommendation				
<p>Since the CLCS design is proceeding assuming a system level software architecture, include a Software Architecture Requirements section that provides the higher level requirements for the CLCS Software design.</p>				
9. Impact if recommendation not implemented				
<p>Unclear CLCS requirements.</p>

Response Attachment 200-101

The RID Management Team agrees that there is no section for Software Architecture Requirements that provide a higher level set of requirements for the software design. However, it does not agree that the value added by adding such a section justifies the expenditure of time and effort.
